Protective Earth Connection

Protective Earth (PE) screw type recommended is 10-32 UNC standard not provided with SSR. Through the use of a DIN rail ground (protective conductor) terminal block, the DIN rail itself can be used as the grounding bus bar. In this case, the zinc plated steel material used for the DIN rail clip of DR22 models, permits a secure path to ground and avoid the need of a further PE connection.

GENERAL NOTES

- (1) All parameters at 25°C unless otherwise specified.
- (2) Low current loads and high ambient temperature can affect turn-on time.
- (3) 8 VDC Minimum control voltage. Resistive loads only . Consider switching losses; at maximum frequency reduce to 75% output current.
 Recommended suppressor diode connected at load side, see wiring diagram.
- (4) Increase minimum voltage by 1 V for operations from -20 to -40°C.
- (5) Minimum spacing to obtain max. current is 22.5mm between adjacent units.
