### **UTX<sup>™</sup> PV Cable Connector**

The UTX<sup>™</sup> from Amphenol Industrial Solar Technologies (AIST) is a robust, triple-certified DC connector with UL 6703 1500V, IEC 62852 1500V (Class A), and JET IEC 61730 1500V specifications, making it the first connector available for usage in all major global PV markets. The UTX<sup>™</sup> is an evolution of AIST's well-known H4 connector, with the same solar industry-standard mating configuration, Amphenol's low resistance RADSOK<sup>®</sup> contact technology, ability to accept wire gauges from 14AWG/2.5mm<sup>2</sup> to 8AWG/10mm<sup>2</sup>, and an IP68 rating. Enhancement's over the H4 include the UTX<sup>™</sup>'s ratcheting gland back nut, which prevents backspin once the nut is tightened. The total volume and characteristics of the materials used to make and robust design. By using gland nuts, environmental multiple wire gauges, part count and total SKUs go down, while cost-savings go up. AIST's UTX™ connector is the ideal choice for all PV modules and installations, regardless of end-market, around the world.
