

### UltraMOV® 25S Varistor Series

#### Description

The UltraMOV® 25S Varistor Series is designed for applications requiring high peak surge current ratings and high energy absorption capability. UltraMOV™ varistors are primarily intended for use in AC Line Voltage applications such as Surge Protective Devices (SPD), Uninterruptable Power Supplies (UPS), AC Power Taps, AC Power Meters, or other products that require voltage clamping of high transient surge currents from sources such as lightning, inductive load switching, or capacitor bank switching.

These devices have 25mm square forms are produced in a radial lead package and offered with straight leads. UltraMOV® 25S varistors are manufactured with recognized epoxy encapsulation and are rated for ambient temperatures up to 85°C with no derating. This 25S Series is LASER-branded and is supplied in bulk packaging.

### Transient V-I Characteristics Curves

#### Peak Current, Energy and Power Derating Curve

For applications exceeding 85°C ambient temperature, the peak surge current and energy ratings must be reduced as shown above.

#### Peak Pulse Current Test Waveform for Clamping Voltage

$O_1$  = Virtual Origin of Wave

T = Time from 10% to 90% of Peak

$T_1$  = Rise Time = 1.25 x T

$T_2$  = Decay Time

**Example** - For an 8/20 µs Current Waveform:

8µs =  $T_1$  = Rise Time

20µs =  $T_2$  = Decay Time
